New official access and exit rules for paddlers on the Muota River

Together with the landowners, farmers and the Muotathal District Council Authorities, an official access and exit agreement for paddlers on the Muota River has been negotiated, which comes into effect from spring 2017. The aim of the Agreement is to limit the impact of canoeing on the farmed land and pastures along the Muota.

VERY IMPORTANT!!

The Agreement specifies official access and exit points for canoeists and users of other craft on the Muota. These points are all suitably signed. Similarly, various panels indicating areas where exit is forbidden, except in an emergency, have also been erected along the river.

It is strictly forbidden to put in or take out at any other points along the river.

Failure to comply with these rules regarding access and exit points and other specially designated areas may be subject to fines.

It is essential that all paddlers follow these new instructions. Thank you.
